The first drawing illustrates the internal structure of the eye, showing the lens, iris, and retina. The second drawing shows the ear, highlighting the eardrum and the ossicles. The text below the drawings provides a detailed description of the anatomy and function of these organs.

The eye is a complex organ that allows us to see. It consists of several parts, including the lens, iris, and retina. The lens is a clear, biconvex structure that focuses light onto the retina. The iris is a colored structure that controls the amount of light entering the eye. The retina is a layer of light-sensitive cells that convert light into electrical signals that the brain can interpret.

The ear is also a complex organ that allows us to hear. It consists of several parts, including the eardrum and the ossicles. The eardrum is a thin, membrane-like structure that vibrates in response to sound waves. The ossicles are three small bones that transmit the vibrations from the eardrum to the inner ear.

The diagrams above show the internal structure of the eye and ear. The eye diagram shows the lens, iris, and retina. The ear diagram shows the eardrum and the ossicles.

Hand anatomy diagrams illustrating the bones and muscles of the hand and forearm.

The diagrams show the hand from various perspectives: dorsal (top left), palmar (top right), lateral (middle left and middle right), and lateral forearm (bottom left and bottom right).

The bones of the hand and forearm are labeled, including the radius and ulna in the forearm, and the metacarpals and phalanges in the hand.

The muscles of the hand and forearm are also labeled, showing their locations and orientations.

1. 凡欲求道者，必先正心。心不正，則身不正，身不正，則事不成。此三者，乃修身之要也。

2. 其次，當求其學。學不問則愚，思不問則惑。故君子居則學，行則思，坐則論，臥則寤。

3. 又其次，當求其德。德者，本也。財者，末也。外本而求末，是倒置也。

4. 德者，下之所歸。財者，人之所欲。德足以懷遠，財足以濟困。

5. 故君子必先慎乎德。德有餘，則財用不乏。德不足，則財用不足。
