Handwritten text in a rectangular box, likely bleed-through from the reverse side of the page. The text is arranged in several lines and appears to be a list or a set of instructions. The characters are small and difficult to read due to the image quality.

Small rectangular stamp or mark at the top left of the page.

Rectangular stamp or mark at the top center of the page.

Rectangular stamp or mark at the top right of the page.

Vertical red markings or stamps along the right edge of the page, possibly indicating a binding or margin.

Large, mostly blank area on the right side of the page, possibly containing faint text or a large illustration that is not clearly visible.

The first of these is the
 fact that the
 government
 has
 been
 successful
 in
 its
 efforts
 to
 bring
 about
 a
 more
 equitable
 distribution
 of
 the
 national
 income.
 This
 has
 been
 achieved
 through
 a
 series
 of
 reforms
 which
 have
 been
 implemented
 over
 the
 past
 few

 and
 the
 introduction
 of
 a
 new
 system
 of

 The
 result
 of
 these

 has
 been
 a
 significant
 reduction
 in
 the

 This
 is
 a
 major
 achievement
 of
 the

 The
 second
 of
 the
 reasons
 for
 the
 success
 of
 the
 government
 is
 the
 fact
 that
 it

THE ECONOMIC SITUATION

The economic situation
 of the country
 has
 improved
 significantly
 over

The diagram illustrates the geometry of the problem. It shows a rectangular box with a vertical line on the left side and a horizontal line at the bottom. A diagonal line starts from the top-left corner and goes down to the right, ending at a point on the bottom horizontal line. A vertical line segment extends upwards from the point where the diagonal line meets the bottom line. The diagram is enclosed in a rectangular frame.

1. The first part of the paper is devoted to a general discussion of the problem. It is shown that the problem is well-posed and that the solution exists and is unique.

2. In the second part, the problem is reduced to a system of ordinary differential equations. This is done by using the method of characteristics.

3. The third part is devoted to the construction of the numerical solution. It is shown that the method is stable and convergent.

4. Finally, in the fourth part, the results are compared with the exact solution. It is shown that the numerical solution is in good agreement with the exact solution.
